Pre-Emergence Sprayer

12,000 ACRES x \$4.50 = \$54,000

Post-Emergence Sprayer

Dry Applicator

x \$3.00 = \$45.500

Earn \$200,000 Each Year - From Application Revenue Alone!

When it comes to making money....nothing else even comes close! The Mertz 300 DX is the only post-emerge sprayer that doubles as a "True" Liquid and Dry floater with a 1800 gallon tank and a 14' spreader – plus 55 mph road speed capability. You can eliminate one liquid floater, one dry floater, and set your existing hydrastat aside for 85% of your post spraying for an unbeatable return on investment!

Our light weight yet rugged 300 DX will easily double the post acres per day that you can spray with a hydrastat and operators love the ease of driving down rows with the forward mounted front tires. You can save a lot of money on depreciation, maintenance, and fuel by idling your high maintenance hydrastat 85% of the time and increase your efficiency at the same time. You can probably downsize your high clearance equipment and lengthen their useful life also.

It is not often that you can improve your bottom line, save money, and enjoy a longer service life, while cutting your maintenance bills at the same time. What are you waiting for, Call Today!
